ashura.site

Lagos, Nigeria

PROFESSIONAL SUMMARY

Freelance Frontend Web Developer with 3–5 years of experience building fast, responsive, and visually polished websites for businesses and startups worldwide. Specialist in HTML5, CSS3/SASS, and JavaScript (ES6+) with growing expertise in React.js. Focused on delivering pixel-perfect, mobile-first builds that load fast, look great on every device, and convert visitors into customers. Currently open to remote freelance projects and long-term global contracts.

EXPERIENCE

Freelance Frontend Web Developer

2020 – Present

Self-Employed · Remote

- Designed and developed a fully responsive e-commerce storefront (ashura.site/preview/bags.html) using HTML5, CSS3, and JavaScript ES6+, achieving a pixel-perfect, mobile-first UI with clean product listings and intuitive navigation that demonstrates production-ready frontend delivery.
- Built a multi-category gadgets retail website with dynamic product rendering and responsive grid layouts using HTML5 and CSS3, delivering a scalable, cross-browser compatible frontend that reduced client review iterations through clean, well-structured code.
- Worked directly with small business clients to translate requirements into live, functional websites — managing the full frontend lifecycle from layout to deployment — resulting in on-time delivery and maintainable codebases handed off via Git version control.

EDUCATION

Federal University of Petroleum Resources · Effurun, Delta State, Nigeria

Expected 2026
